

June 2006 Newsletter

Multiple Starview MR2's used in cellular manufacturing.

No, this is not a mirrored photo. This was one of three groups of machines ordered by a major consumer goods manufacturer. These MR2-1418 machines have production goal displays and light towers that allow supervisors to observe operation at a glance. These special machines included a shelf on top of the machine for packaging materials that included a sensor to double check that the operator has picked all of the components for each package.

These machines feature quick-change sealing fixtures and quick change relieved face plates for fast tooling changeover. This has given the client the opportunity to operate lean manufacturing and still meet customer requirements. Multiple machines can run the same product if the volume is high or the machines can all be running different SKU's to provide a continuous output of over 30 different packages.

Starview MR2 machines are available with sealing areas of 12" x 14", 14" x 18" and 18" x 22" to accommodate a variety of package sizes. Popular options include locking casters and quick-change for relieved face plates. Details for the standard MR2 machines may be found by following this link: <http://www.starview.net/products/mr.html>.

### **Starview Summer Holiday Production Shutdown Schedule.**

Our manufacturing facility will be closed for the annual summer shutdown during the weeks beginning July 16<sup>th</sup> and July 23<sup>rd</sup>. The office staff will be available to answer questions, provide quotations and make emergency shipments of repair parts. Machines are generally not shipped during this time.

### **Starview Newsletter Schedule.**

We will not publish a newsletter for the months of July and August. Our September newsletter will have full details about Starview and PackExpo International 2006.

**Let Starview assist your customers with machines designed to make the total manufacturing process more effective. Contact one of our sales staff for packaging solutions to help your customers reduce cost and stay competitive.**
