

June-July 2007 Newsletter

Are you ready? It's Showtime!

**October 15-17, 2007**  
**Las Vegas Convention Center**  
**Las Vegas, Nevada USA**

---

Co-located with PROCESS EXPO  
and with Converting & Package Printing EXPO

**Plan to visit with us at Pack Expo 2007. As in the past we will be located in the Central Hall Booth # C-2814.**

We will be showing the latest innovations in Clamshell and Blister Sealing Machines. We plan to have examples of the latest sustainable retail carded packaging available. Our newest offerings in film to tray Food Packaging Machines as well as Vacuum Packaging Machines will be demonstrated. We will be producing Medical Device Packages on our single station shuttle medical package sealer with controls for process validation.

We have a limited number of Invitations available to allow free entry into the Exhibit Hall. If you would like one of these invitations please contact us by email: [steve@starview.net](mailto:steve@starview.net).

**A second exhibition for Starview in October 2007.**

**Visit Starview at Booth #N2765 located in the North Hall.**

This is an exhibition promoted directly to the food processing and packaging industry. We are excited about showing our food packaging machines to prospects primarily interested in Food Packaging.

Starview's showcase will be an all new Perseus II multi-lane Film to Tray Automatic Inline Food Packaging Machine. We will also be exhibiting the Olympus Two-station Manual Rotary Film to Tray Food Packaging Machine. Finally shown & demonstrated for the first time Starview's new line of Vacuum Chambers for Food Packaging. All of the machines exhibited have MAP capability.

## Machine Delivery Times from Starview.

OK, so why are all of our lead times extended?

It's a good news-bad news scenario. For the last year and a half we have been receiving and producing a significantly higher level of machine, tooling and replacement parts orders. The increase in business activity is 25% over last year. That is the good news.

The bad news is that we no longer have the space or manpower to put finished machines in stock for shorter than normal delivery. It also means that because of our large order backlog there is a cue in every department. We will give a projected delivery range with our quotations; however, this is subject to change based on our order backlog at the time your order is placed. Other items that may impact your delivery include providing samples when required and retuning associated approval drawings on a timely basis.

As always our goal is to provide you with machines that are properly designed, manufactured and tested. We will continue to strive to make improvements in our facility and staffing that allow Starview to give the best possible lead times.

**Let Starview assist your customers with machines designed to make the total manufacturing process more effective. Contact one of our sales staff for packaging solutions to help your customers reduce cost and stay competitive.**
