

We would like to take this opportunity to wish everyone a Happy Holiday Season.

Starview will be closed for the Holiday Season on December 24th and 25th, 2015 and again on December 31, 2015 and January 1, 2016.

**See the latest Medical Device/Pharma Packaging machines from Starview
at MD&M West, Anaheim, California.**

We are exhibiting for the first time at MD&M West. We are located in the WestPack Hall near the Nutra-ceutical Packaging Pavilion.

See for the first time our **NEW** MS/PH1-1418 Single-station shuttle heat sealer. This model will feature our Optional auto-shuttle feature. The MS/PH1-1418 with auto-shuttle will be demonstrated continuously. We will also have on display our ERB/PH4-1418 semi-automatic rotary medical device packaging machine with a finished package unloader and conveyor system. All of our medical device / pharma packaging machines feature process controls for third party validation. These machine controls may be calibrated and are adjustable through the touch screen HMI to match calibration results. Machines are designed and manufactured for clean room operation.

Materials running on our machines are compliments of Universal Protective Packaging, Inc. and Amcor Flexibles.

New feature for Starview's Semi-automatic and Automatic Blister Packaging Machines.

Starview's ERB, FAB, CBS and BSC machines may now have an optional EZ-light touch button mounted on the perimeter guard for single cycle operation.

Simple operation with the touch of a finger, hand or whole palm. The function is easily actuated with bare hands or work gloves. The ergonomic design requires no physical pressure to operate, preventing stress on hands and wrists. Button operation is activated/deactivated from the HMI. The operator station is installed with quick-connect plug so that the station can be relocated to the most convenient location by the user.

Click on the photo [or here](#) to see a short YouTube video showing the touch-screen set-up and operation of this new option.
